# Vicente González

Software Backend Engineer

## HERE'S MY STORY:

I am a quick learner, hard-working, ambitious person, motivated by goal achievements, having a multi-perspective approach towards a situation. Nothing provides me with more satisfaction than bringing contribution to the success of a project.

## WORK EXPERIENCE

### Payvision

**SOFTWARE BACKEND ENGINEER**  
**MARCH 2020 - PRESENT**

Working developing and maintaining high-availability solutions focused on payments area, in distributed environments using good practices as TDD and SOLID.

- Core technology: .Net Core, Dapper, MS SQL Server, Azure DevOps.
- Core testing technology: XUnit, NSubstitute and Fluent Assertions.

### Wolters Kluwer

**SOFTWARE ENGINEER**  
**JUNY 2017 - MARCH 2020**

Working developing and designing architectures for web applications and REST API's focused on legal area, applying TDD and integrating monitoring tools for those applications.

- Core frontend technology: Vue.js, Blazor and Razor.
- Core backend technology: .Net Framework, Net Core, WCF, MS SQL Server, Oracle and Entity Framework.
- Core testing technology: Selenium, NUnit and RhinoMocks.

### Frutas Nene

#### FREELANCE

- Development of customized applications based on .NET for internal management.
- Identification and troubleshooting of physical and network infrastructure problems.
- Internal applications maintenance.

## EDUCATIONAL INFO

### University of Extremadura

#### DEGREE IN SOFTWARE ENGINEERING

- Graduation Date: Juny 2017,
- Honors: Web Development, Database Design and Administration, and Database Development,
- Academic record: 7.65 out of 10,

### University of Parma

#### INTERNATIONAL COURSE IN SOFTWARE ENGINEERING

- Attended the academic year 2015/2016
- Honors: Software Engineering and Computer Architecture.
- Academic record: 8.56 out of 10,

## TECHNICAL SKILLS

- Strong solid principles, design patterns and OOP knowledge.
- Strong knowledge about data structures, how to efficiently and when to use it.
- C# is my language par excellence and where I feel comfortable.
- As alternative languages that I also use are Javascript and Python.
- My main frameworks is .NET Core, and as frontend, Blazor and Razor, also as secondary I can consider Vue.js and Angular.
- SQL Server as database engine.
- Some of the technologies where I have experience of use are, RabbitMQ, OpenApi, OpenTelemetry, NLog, Azure DevOps for CI/CD, and SonarQube.
